PROFESSIONAL EXPERIENCE

IBM May 2024 - Present

- Currently working at IBM on a project for Mahindra and Mahindra Finance to develop a customer-centric finance application. The app enables users to access various financial services (such as loans, investments, etc.) and apply for specific features. It includes user-specific authentication and integrates payment gateways like Camspay and PayU for seamless transactions. My role involves overseeing the integration of these features while ensuring security and scalability of the platform

Wohlig Transformation Private Limited, Mumbai, Senior SDE September 2023– April 2024

- I've worked on a project that involved integrating an end-to-end dashboard using technologies like Vue 3, Bootstrap, and PrimeVue for a client in the health insurance brokerage sector.

- I'm currently focused on projects that involve using Tailwind CSS and React.js for frontend development. In this role, my responsibilities include updating functionality, mentoring junior team members, conducting code reviews, maintaining coding standards, and ensuring timely project delivery.

Media.Net Software Services (India) Private Limited, Mumbai, UI Developer January 2019 – September 2023

- Engineered an automated HTML/CSS generator using JavaScript, significantly reducing the turnaround time for daily tasks.

- Spearheaded the development and implementation of an automated mailer system at the

organizational level, utilizing technologies such as PHP and Google Sheet API.

- Played a pivotal role in defining coding standards, conducting code reviews, and leading knowledge sharing sessions.

- Fostered close collaboration with Business Developers to effectively deploy daily tasks and ensure project alignment.

- Provided mentorship and coaching to junior developers, while consistently overseeing project delivery.

- Led the development of multiple mobile-responsive websites on WordPress, ensuring seamless user experiences across various devices.

- Actively contributed to enhancing and evolving existing products by conceptualizing, designing, and implementing new features.

- Designed and developed JavaScript demos for various projects to showcase key functionalities and enhance user understanding.

- Successfully managed internal projects within tight deadlines, focusing on delivering premium UI designs.

- Collaborated with premium clients to develop and deliver new features and requirements on a weekly basis, utilizing technologies including WordPress, Vue.js, Tailwind CSS, HTML, CSS, JavaScript, and Git.

- Worked on an internal organizational product aimed at improving HR department management and workflow efficiency, utilizing technologies such as React.js, Next.js, Prisma, and Tailwind CSS.
